1. 1GB = 1 billion bytes; actual formatted capacity is less.

2. Song capacity is based on 4 minutes per song and 128-Kbps AAC encoding; photo capacity is based on iPod-viewable photos transferred from iTunes. 25,000 photos refers to 2GB and 4GB iPod nano. 1GB iPod nano holds up to 15,000 photos.

3. Rechargeable batteries have a limited number of charge cycles and may eventually need to be replaced. Battery life and number of charge cycles vary by use and settings.

4. iPod and iTunes are for legal or rightholder-authorized copying only.
